Automating Data Import and Relationship Mapping Using Import Sets & Dot Walking

5.PROJECT DEVELOPMENT PHASE

5.1 PERFORMANCE TESTING

5.1.1 Project Development

1.Problem statement

2.Empathy Map Canvas

3.Brainstoring and Idea Prioritisation

4.Data flow diagram & User Stories

5.Solution Requirement

6.Tecnology Stacks

Why you'll learn

1. In the future, the project can be improved by adding more advanced features.
2. The system can be developed as a mobile application for easy access.
3. Security features can be enhanced to protect user data.
4. The user interface can be improved to make the system more user-friendly.
5. Cloud storage can be added to store and manage data efficiently.
6. The system performance can be optimized for faster processing.
7. More users can be supported with better database management.
8. Additional functions can be included based on user requirements.
9. Regular updates can be provided to improve system reliability.
10. This project can be expanded and integrated with other technologies in the future.
